Minister of Trade and Commerce,
Ottawa.

Sir,—In submitting the Eleventh Annual Report (year ended June 30, 1903), it does not appear necessary to more than call attention thereto, as the figures speak for themselves and show continued prosperity and a large increase in the volume of trade, both as regards Imports and Exports, the former having grown from $212,270,158 in the previous year to $241,214,961, and the latter from $211,640,286 to $225,849,724, an aggregate gain of over $43,000,000 during the year.

In the year 1875 the total trade was in round figures $201,000,000; in 1885 the figures were about $3,000,000 less; in 1895 they had grown to $224,420,000, or an increase in 20 years of about $23,000,000; whereas in the eight years from 1895 to 1903 they have gone up to $467,064,685, or an increase of over $242,000,000.

From reports of the Agents of this Department it would appear that there are good openings for several lines of Canadian goods to be found in South Africa, Australasia, and (probably) Japan.

One difficulty in pushing trade arises from the fact that up to this date or at least till a very recent period, Canadian manufacturers have been so fully occupied in supplying demands for the home market that they have not been able to give any attention to outside customers.

Importers inform our Agents that in many cases they find it very difficult to obtain any reply from Canadian firms for several months and that they are constantly told that they cannot accept orders. Furthermore it is almost indispensable that any firm desirous of carrying on a considerable business at a distance should be represented by some agent or traveller especially in view of the fact that so many German and American travellers are already on the ground.

It may be added that the long continued depression in Australia and the fact that ever since the close of the Boer war, great quantities of supplies imported by the British Government for the use of the army, have been slaughtered at extremely low prices, have affected those markets more or less injuriously.

Appended is the usual unrevised statement for the six months of the current fiscal year, an examination of which will show the rates of increase over the corresponding period in 1903 well maintained, the imports having largely increased, with a small decrease in exports which may be accounted for by the lateness of the Western harvest preventing the marketing of the usual quantity of grain before the close of navigation. This, however, will begin to move again in early Spring and the values for the full year will no doubt equal or exceed that of 1903.

Respectfully submitted,

W. G. PARMELEE,
Deputy Minister.

COINAGE, WEIGHTS AND MEASURES.

To assist in arriving at a comprehensive understanding of the value of foreign currencies, weights and measures (as expressed in foreign trade returns, tariffs, &c.,) as compared with those of Canada, tables have been prepared as follows:—

As regards those of Canada, the law provides that the denominations of money in the currency of Canada shall be dollars, cents and mills, the cent being the one hundredth part of a dollar, and the mill one-tenth part of a cent.

That—The currency of Canada shall be such that the British sovereign (the pound sterling) of legal weight and fineness, shall be equal to four dollars eighty-six cents and two-thirds of a cent.

In like manner the law provides as respects weights, that the unit shall be the standard pound (avoirdupois) of 7,000 grains, one-sixteenth part of the standard pound shall be an ounce (437½ grains) one hundred pounds a cental, and two thousand pounds a ton, and that four hundred and eighty grains shall be an ounce troy, or 5,760 grains a pound troy.

As regards measures—that the unit or standard measure of capacity, as well for liquids as for dry measures, shall be the gallon containing ten standard pounds weight of distilled water weighed with the water and air at a temperature of sixty-two degrees Fahrenheit, with the barometer at thirty inches, that the quart shall be one-fourth part of the gallon, and the pint one eighth part of the gallon, and that eight gallons shall be a bushel.

This gallon commonly known as the "Imperial Gallon," contains 277·274 cubic inches, or 353·036 cylindrical inches.

The standard measure of length is the yard, one-third part of which it is provided shall be a foot, and the twelfth part of such foot shall be an inch.

In many countries the Metric system of weights and measures has been adopted. A separate table of Canadian equivalents of these is given in order to avoid repetition, the word "Metric" being used in the general table in each case where the system is in vogue, as indicating a reference to that table.

The equivalent value of the monetary unit can only be given as respects those countries having a gold standard. Where silver is the standard, the value of the currency necessarily fluctuates correspondingly to the market value of silver bullion, and were any attempt made to quote the value of such currency it would, under present circumstances, be misleading, therefore, the weight in decimal parts of an ounce with the fineness of the coin is given instead, which will enable any one to approximate the value of the currency according to the current value of fine bar silver. As an example, say fine bar silver at 75 cents an ounce, the Bolivian dollar weighs ·801 of an ounce, its fineness is ·900, therefore 75 × ·801=60·075 which × ·900=54·0675, or a small fraction over 54 cents, and the actual intrinsic value of the pure silver contained in the coin, to which should be added a reasonable allowance to cover the value of the alloy, the cost of the coinage, and in some instances exchange, the aggregate of which would be approximately the current value in Canadian currency of the dollar in question.

Unless carefully noted, the quotations as usually given of the current value per ounce of silver may be misconstrued and lead to misapprehensions, as it is sometimes quoted per ounce *fine*, and sometimes per ounce *standard*; thus for instance on a certain day the London quotation reads "fine silver per ounce standard 32 d.," while on the same day it is quoted in New York "69½ cents per ounce fine;" as 32 d. is equal to a fraction over 64⅝ cents, there would appear a difference of about 4⅝ cents per ounce between the two prices, the New York price appearing that much in excess of the other, were it not noticed that one is based upon *standard* fineness and the other upon absolute fineness, but by reducing the New York "fine" to London "standard" (of ·925 fine, or 444 grains fine to the ounce) the actual difference between the two quotations is found to be only about ⅝ of one cent per ounce, the London price being that much in excess of the New York.

To reduce the value of *standard* or sterling silver when expressed in pence to *fine* expressed in cents, multiply the pence and decimal parts thereof by 2·192.

To find the *standard* or sterling value expressed in pence and decimal parts thereof when *fine* is expressed in cents multiply the cents by 0·4562.

* Old weights and measures sometimes used. ‡ The values in Chinese Imperial Customs Returns are always given in Haikwan taels, which are relatively in value equal to about 1·113 Shanghai taels. The tael is in reality not a standard of value (there is no such coin), but of weight, and when used in the sense of a value it only represents its weight in gold or silver, as the case may be, the real difficulty is to establish its exact equivalent in grains. Authorities differ greatly, as also does the practice in different sections of China. The Chinese are far from being inexact, and the probability is that there exists a standard, and a further probability that it is equal to 10 Japanese mommes, or 579·72 grains, which figures have been used in computing the value as above. It will be observed, however, that these figures fall short about 3·61 grains from the weight usual (say 1⅛ oz. per tael) in dealing with the weights other than those of gold and silver. † For many years the value of the peso in Chile has been 91·2 cents, but by the Resumption Act of Feb. 11, 1895, the value of the peso is made equal to 18 pence = 36·5 cents. § Usually reckoned same as Chinese Picul of 133⅓ lbs. ϕ This is long measure. Cloth measure is 25% greater in length than long measure. Therefore by cloth measure 1 sun=1·4916 in., 1 shaku = 14·916 in. and 1 jo = 149·6 in. ‖ Japan has adopted the Gold Standard, which came into effect Oct. 1st, 1897. Value of Gold Yen being 49$\frac{8}{10}$ cts.

TABLE of constant Factors, which multiplied by the current value per ounce of silver, either pure or standard as the case may be, will give the value of the silver contained in the coin referred to, to which if there be added a small percentage to cover the value of the alloy and the cost of coinage, the aggregate will equal the then intrinsic value in Canadian currency of the coin in question.

CHINESE IMMIGRATION.

No. 38.—Statement showing the Transactions under the Chinese Immigration Acts to June 30, 1903.

The original Act went into force as respects arrivals by vessels sailing from ports in North America on August 20, 1885, and as respects arrivals by other vessels on January 1, 1886, *vide* 48–49 Victoria, chapter 71.

The Act as it appears in the Revised Statutes, chapter 67 (1886), is slightly changed from the original. There have been since then two amendments thereto, viz.: as per 50–51 Victoria, chapter 35 (1887) and 55–56 Victoria, chapter 25 (1892).

These general Acts were repealed by the Act 63–64 Victoria, chapter 32, which came into force Jan. 1, 1901. There has been since then one amendment thereto, viz.: as per 2 Edward VII., chapter 5 (1902).

The Act 63–64 Victoria, chapter 32 (1900) and Act 2 Edward VII., chapter 5 (1902), are repealed by the Act 3 Edward VII., chapter 8 (1903), which came into force January 1, 1904.

The administration of the Act was by Order in Council of September 1, 1885, assigned to the Department of Customs and transferred to the Department of Trade and Commerce by Order in Council of March 13, 1893.

The annual revenue, expenditure, &c., has been as follows:—

During the same period 16,635 Chinese have taken out certificates of leave or registered for leave up to June 30, 1903, while a very large number have left the country without so registering, having no intention of returning, so that, for this latter reason, the exact number remaining in the country is uncertain.
